ABOUT ME

I have a solid background in programming and software development. I am currently a fourth-year student at Norton University, majoring in Software Development. During my studies, I have learned by doing and built real-world projects using different programming languages. These experiences have helped me improve my technical skills and gain more practical knowledge.

I am looking for a position where I can use what I have learned and gain more real-world experience. I enjoy solving problems and building applications that are fast, useful, and user-friendly. I also want to keep learning, improve my skills, and become a helpful part of a team that focuses on new ideas and good-quality work.

EXPERIENCE

Technical Training

2023 – 2024

During this job training, I gained practical experience in Flutter and Dart mobile app development, responsive web development using HTML, CSS, and JavaScript, and UI/UX design. I learned how to create clean, simple, responsive, and user-friendly interfaces for both mobile and web applications while improving my understanding of writing clean and maintainable code.

Flutter Developer Internship

2025 - 2026

During this internship, I gained practical experience as a Flutter Developer by developing mobile applications using Flutter and Dart. I worked on creating responsive and user-friendly mobile interfaces, integrating REST APIs to fetch and display data, and connecting applications with backend APIs for data management. I also tested applications, fixed bugs, and improved their stability and overall performance.

EDUCATION

2016 - 2022

- 2016 : Graduated Primary School at VIHEASOUR Primary School
- 2019 : Graduated Secondary School at VIHEASOUR Secondary School
- 2022 : Graduated High School at ROTA High School

2022 - Present

NORTON UNIVERSITY

- Fourth-year student in Semester II, specializing in (Software Development) at NORTON UNIVERSITY.
