PROFILE

I have a solid background in programming and software development, as I'm currently a fourth-year student at Norton University majoring in Software Development. Since then, I've been learning by doing, building real world projects using multiple programming languages that helped me hone my technical ability.

I am looking for a position where I can use what I learned in real-world experience. I love to solve problem and build applications that are fast as well as userfriendly. I want to keep learning, growing, and contributing to an organization that values innovation and quality work.

WORK EXPERIENCE

I became part of the tech staff about a year ago and I've been able to learn and grow into different roles. I have worked as both web developer and mobile app developer which has allowed me to contribute to different project types and gain hands-on experience along the way.

I've worked on many areas beyond development, including UX/UI design. The ability to bring the front-end design elements and back-end functionality together has allowed me to build applications that are not just functional but also visually appealing and easy to use. I enjoy finding the balance between design and performance to deliver a better user experience.

EDUCATION

2016 - 2022

- 2016 : Graduated Primary School at VIHEASOUR Primary School
- 2019 : Graduated Secondary School at VIHEASOUR Secondary School
- 2022 : Graduated High School at ROTA High School

2022 - Present

NORTON UNIVERSITY

- Fourth-year student in Semester II, specializing in (Software Development) at NORTON UNIVERSITY.
